FORD **PERFORMANCE**

The Most Powerful Ranger We've Ever Built

Inspired by desert racing, the Next-Gen Ranger Raptor has been developed with Ford Performance DNA for true enthusiasts.

Get Excited

Blending raw power with mechanical and technical precision, the Next-Gen Ranger Raptor delivers pure exhilaration.

3.0L V6 Twin-Turbo EcoBoost Engine

Produces up to 292kW at 5650rpm and 583Nm of torque at 3500rpm.

Mated to a performance tuned 10-speed automatic transmission with a race-bred anti-lag system available in Baja mode improving acceleration out of corners.

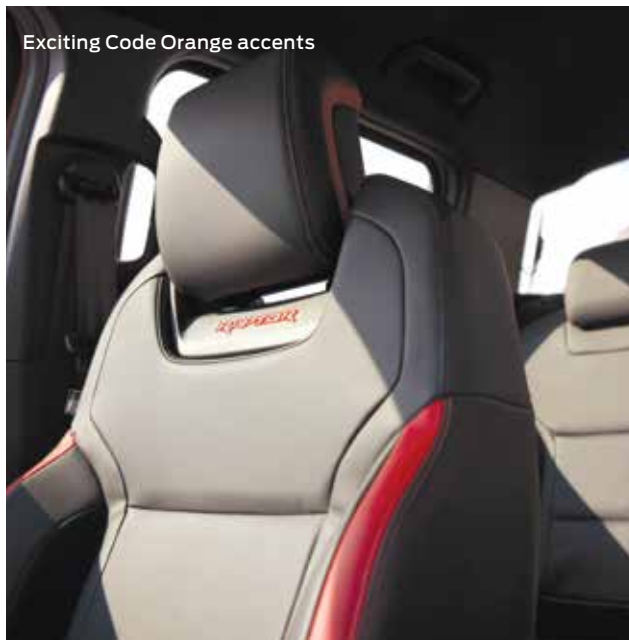

Selectable drive modes

Signature C-Clamp headlamps

A reinforced chassis, new shock tower mounts, unique upper and lower control arms and a refined Watts link rear end allows the Next-Gen Ranger Raptor to handle punishing off-road conditions.

Performance Bred Interior

All-new, jet fighter-inspired sports seats in the front and back are more comfortable and supportive during spirited driving.

Sophisticated Suspension

FOX 2.5" Live Valve Internal Bypass Shock Absorbers

Cutting-edge internal bypass dampers tuned and developed by Ford Performance can react and adjust to the terrain and driving style 500 times a second. Get ready for the ride of your life.

Connect Anywhere

The Next-Gen Ranger Raptor comes fitted with an embedded modem known as FordPass Connect.

Using the FordPass app on your smartphone enables you to locate your vehicle, lock and unlock your doors and even remotely start your engine. Opening up a world of connectivity.

The Next-Gen Ranger Raptor

Optional Decal Package

This brochure was designed to provide you with a general introduction to your Next-Gen Ranger Raptor and was correct at time of going to print. Ford reserves the right, subject to all applicable laws, to discontinue or change features and other specifications either temporarily or permanently, which will be communicated to the Ford Dealer Network. E & OE.

The declared fuel consumption and CO₂ emissions figures were achieved during technical laboratory testing in accordance with the legislated technical specifications (SANS 20101: 2006/ECE R101: 2005 as last amended) and validated and approved by the UK Vehicle Certification Authority (VCA). Fuel consumption and CO₂ emissions figures are used to compare different vehicle types under uniform conditions, and are not necessarily indicative of real-life driving conditions. Note that the actual fuel consumption and emissions levels will include but not limited to many factors and are directly affected by the length of the journey; number of passengers and the amount of luggage carried; individual driving style; road conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle. Your fuel economy will vary based on these and other factors and, for these reasons, many drivers may not achieve the EU fuel economy figures in day-to-day driving, although the vehicle is technically capable of doing so.
